

# Auburn Lewiston Municipal Airport Board of Directors – Special Meeting Agenda January 31, 2024 5:30 P.M. Administrative Conference Room 80 Airport Drive, Auburn, Maine

## Call to Order and Introductions of New Board Members

## I. New Business

**1.** Authorizing the Board Chair to Negotiate and Execute a Joint Development Agreement for Private Hangar Development with Fielding Properties LLC

### II. Reports

- **1.** Board Chair Report
  - a. DRAFT FY25 Budget Presentation and Discussion

## III. Executive Sessions (N/A)

## X. Adjournment (Next Board Meeting, February 14<sup>th</sup>)

Executive Session: On occasion, the Board of Directors discusses matters which are required or allowed by State law to be considered in executive session. Executive sessions are not open to the public. The matters that are discussed in executive session are required to be kept confidential until they become a matter of public discussion. In order to go into executive session, a Director must make a motion in public. The motion must be recorded. An executive session is not required to be scheduled in advance as an agenda item, although when it is known at the time that the agenda is finalized, it will be listed on the agenda. The only topics which may be discussed in executive session are those that fall within one of the categories set forth in Title 1 M.R.S.A. Section 405(6). Those applicable are:

A. Discussion of personnel issues

C. Discussion or consideration of the condition, acquisition or the use of real or personal property permanently attached to real property or interests therein or disposition of publicly held property or economic development only if premature disclosures of the information would prejudice the competitive or bargaining position of the body or agency D. Labor contracts

E. Contemplated litigation

## Auburn – Lewiston Municipal Airport Board Meeting Information Sheet

January 31, 2024

Author: Jonathan P. LaBonte, Board Chair

Subject: Joint Development Agreement with Fielding Properties LLC

**Information**: The Airport, under its Grant Assurances from the FAA, is required to advance initiatives towards achieving financial sustainability. Leasing of airport property for aeronautical activities (development of private aircraft storage, buildings for aviation commercial activities, etc) is a key element of that. At present, the Airport lacks preapproved/pre-permitted sites for private hangar development. Other airports in Maine do have such sites, making them attractive for more efficient movement from interested party to construction.

Fielding Properties LLC is interested in constructing a private box hangar at the airport, and a location of a previously proposed Geneva Aviation Hangar (next to the Cold Storage Hangar) is their preference. Given the economy of scale in engaging engineering firms to complete the site plan approval and state/federal permitting process, it is proposed that the airport board authorize the Board Chair to negotiate and execute an agreement with Fielding Properties to expand their engineering/permitting effort. Rather than permit one hangar and associate apron expansion, we would partner to permit four box hangar sites and associated apron expansion with Fielding Properties LLC eventually holding a lease on one site and the remaining three being available for the airport to promote for further private investment as "shovel ready."

Further analysis is being done on how to finance the apron expansion in an equitable way for Fielding Properties LLC and future investors.

**Airport Financial Impacts**: A proposed one-fourth Fielding Properties LLC and three-fourths Airport for the engineering and permitting is the proposal. This is projected to be between \$40,000 and \$50,000 for the Airport share and would be funded through our FY24 operating budget.

For high level planning/discussion purposes, the construction of four box hangars would create ground lease revenue for the Airport and property taxes in Auburn (and to Lewiston through the tax sharing agreement that is in place until 2029). If we assumed that four 6,000 square foot box hangars would be constructed, here is an example of potential revenue (again for high level discussion purposes):

- Airport Ground Leases Assume 4 sites with 6,000 square foot hangars: \$11,520 annually (~40 years)
- Auburn Property Tax Revenue \$23,660 annually (tax share is first 30% to Auburn, then 50/50 split)
- Lewiston Property Tax Revenue \$12,740 annually (tax share ends in 2029)

Again, those numbers are hypothetical to model for the Board both ground lease and property tax impacts. Actual results will depend on both the timing of private development interest and the choice of hangar design/size and final assessed value.

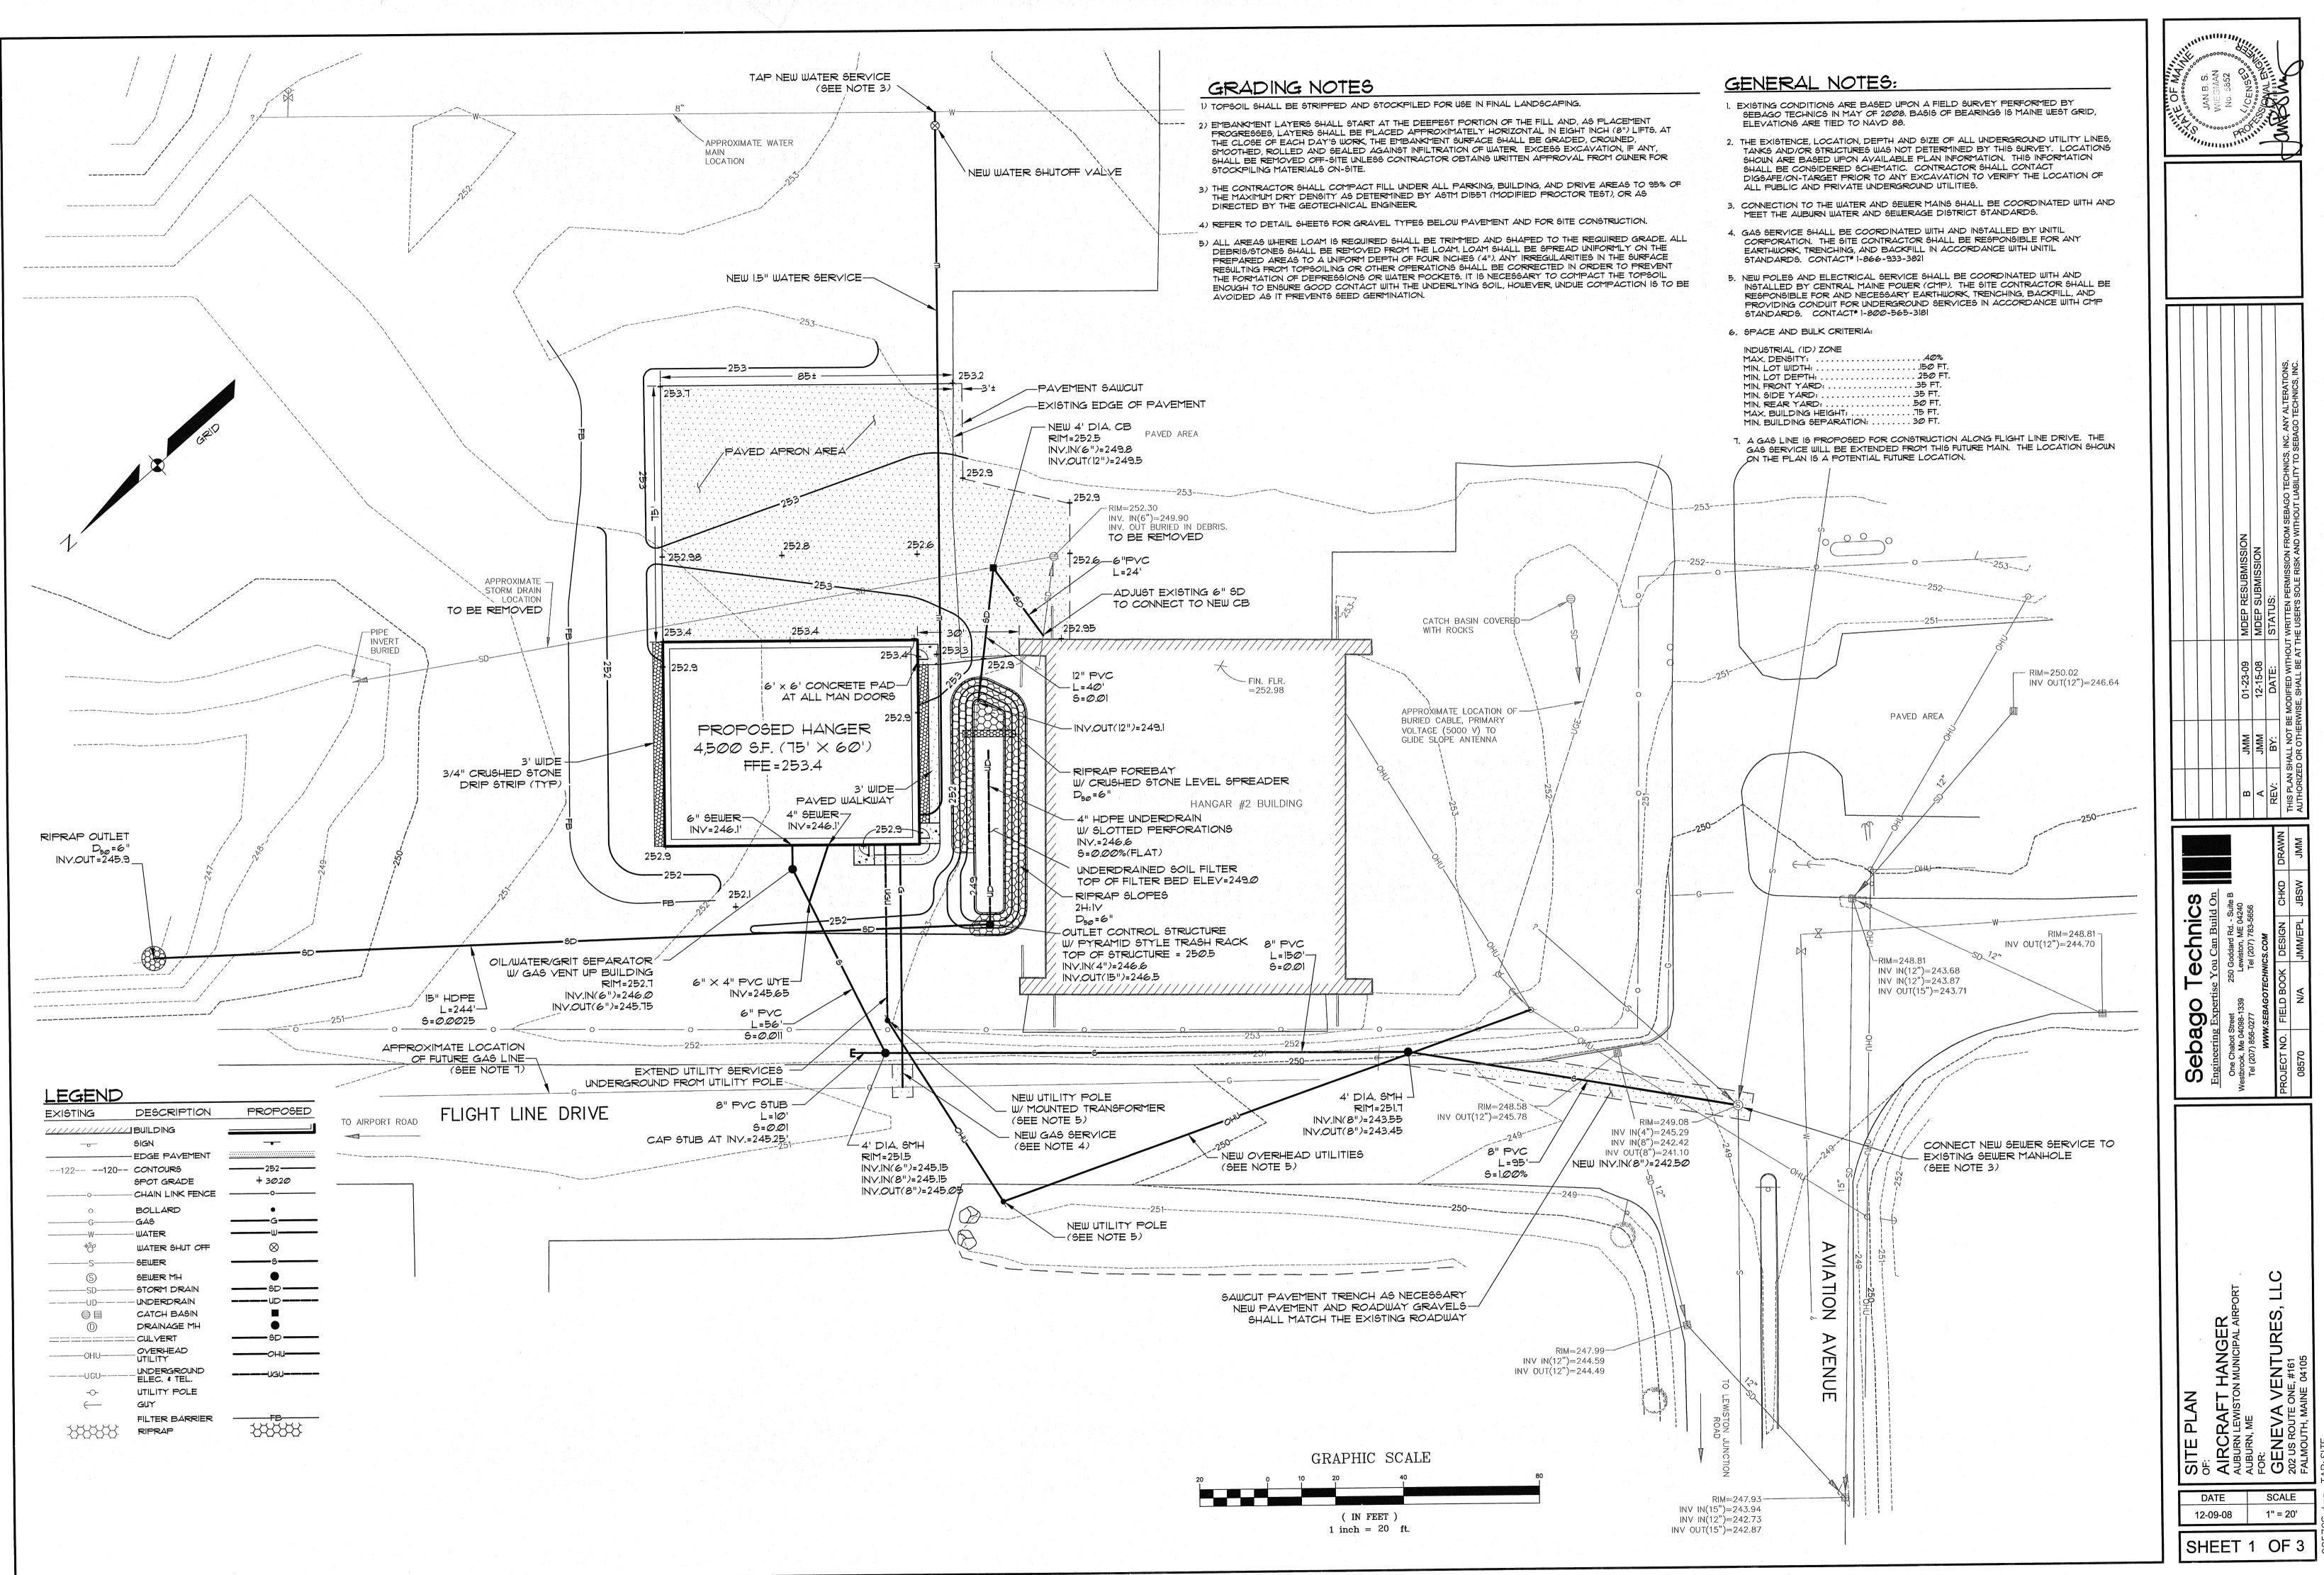

Recommended Action: Approve order authorizing the Board Chair to Negotiate and Execute Agreement

Auburn – Lewiston Municipal Airport Board Meeting Information Sheet

Board Workshop or Meeting Date: January 31, 2024

Author: Jonathan P. LaBonte, Board Chair

Subject: DRAFT Fiscal Year 2025 Airport Budget

**Information**: The budget drivers document from the January board meeting is included. The board still has several months to review this budget, but it is important for the board to first discuss key drivers before we share those with the airport sponsors (cities of Auburn and Lewiston). Per the interlocal agreement, the cities have a subsidy request presented by the board and must provide at least the level of the previous year's subsidy (\$205,000), which is the draft request for FY25.

There are a number of factors still to be refined from this draft (utility projects, professional services/legal costs as we continue to resolve outstandingn FAA Land Use Inspection items, and budgeting for appropriate equipment and building maintenance.

Given the significant changes of the last nine months, we are still mapping out the true actual needs annually across all expense categories. Increasing maintenance lines (pavement, equipment, etc) is a necessity even as we see personnel expenses decline (due to the ongoing reforms of administrative and operations processes).

We have budgeted to meet our obligations to the two cities for debt service on Hangar #5.

For the Board meeting, I will have a slide deck to walk through some of these drivers and my early estimates to help generate discussion.

Airport Financial Impacts: See budget proposal

Recommended Action: Initial feedback on FY25 budget draft

FY25 Budget Drivers Memo from January Board Meeting FY25 Draft Budget (#1) with revenue and expense details

# Auburn Lewiston Municipal Airport - Fiscal Year 2025 Budget Drivers Discussion

## • Airport Personnel and Contracted Services

- The airport continues to monitor staffing needs for all elements of services (administrative, financial, flight line services, and operations)
- Current staffing count is four airport employees, two contracted operations (through Auburn PW and Dirigo Aerospace Solutions), and two contracted flight line services (through Dirigo Aerospace Solutions)
- The staffing count is not FTEs; services are as needed (wildlife mitigation, winter ops, etc).
- The support services that have been leveraged in the airport management transition (Auburn Transportation Director, IT, Finance, PW, HR) were not accounted for in FY24 given the financial realities the airport faced. This will need to be discussed by the sponsors and the airport board in setting the FY25 budget.
- Professional development will be budgeted higher to account for new team members.

## • Airport Building Leases

- Utilities and Building Maintenance Both of these lines should see reductions due to the master leases now in effect for the FBO Hangar and the White Hangar FBO and White Hangar Leases.
- Hangar #5 There is no assurance that we will have a master lease tenant for Hangar #5 for the start of FY25, so the recommendation is to budget conservatively and assume we have a mixed of based-GA tenants and transient aircraft generating revenue there. Utility numbers should become clearer after another month of managing heat in that building. It is my intent to budget for the loan payment to each city in FY25 whether the airport has a master lease tenant or not. Without a master tenant, it will be a net operating loss to the airport.

### • Maintenance Initiatives

- Airfield The airport has only partially converted airfield lighting to LED. Estimates are being secured and continue upgrades of airfield signage to reduce operating expenses over time. In addition, the airport does not have a ready inventory of parts/supplies for airfield maintenance. We are having discussions with vendors and other airports to consider purchasing inventory.
- Pavement Maintenance We expect MaineDOT to include the airport in a pavement conditions assessment during calendar year 2024. For FY25, we will be developing a new five-year pavement management program to use for budgeting into the future. FY25 operations budget activities (non-CIP) will include spot pavement repair and pavement marking and additional crack filling.

## • Computer/Office Setup

 With reduced headcount and re-alignment of responsibilities, FY25 brings the opportunity to set up a base of airport operations in the maintenance building (access to computer workstations, phones, etc). Replacement of dated workstations with new workstations and potential fiber interconnections are possibilities.

# Auburn Air Center

# • Flight Line Services Revenues

- Fuel sales While fuel sales are up in FY24 over FY23, the intent will be to budget conservatively for FY25 in terms of net revenue from fuel sales. Any improvement over budget net revenue (fuel sales value minus fuel expense) will help the airport in building reserve accounts for projects and one-time initiatives.
- Tie downs/hangar/parking This line is ahead of budget in FY24 driven by one-time customer activity tied to Hangar #5. It would likely be budgeted at similar levels for FY25
- Non-fuel services A rate review of landing fees (we don't charge ramp fees) and other service fees will be brought to next budget workshop. Our landing fees are low compared to other airports, and are not an incentive to purchase fuel (where we have better margins) for some customers.

# • Flight Line Services Expenses

- Dirigo Aerospace The intent will be to pursue this relationship in a mutually beneficial way through FY25.
- AvFuel fuel contract The new fuel contract negotiated with AvFuel provides reduced monthly lease costs for the Jet A truck (savings of over \$6,000 annually under ground support equipment).

| REVENUES  | FY2024<br>PROPOSED<br><u>BUDGET</u> |
|---|-------------------------------------|
| FIXED BASE OPERATOR   |                                     |
| Fuel and Oil Sales  | \$ 1,007,750                        |
| Supply cost and local competition drive the fuel price as much as demand and season based on FY24 YTD and assuming flat fuel sales year over year. This is a conservative the FBO.  | , .                                 |
| Tie Down & Hangar Fees  | 60,000                              |
| The storage of aircraft is a service charge for most aircraft because of the liability and<br>and by extension the airport assumes. With the master lease of the FBO and White H<br>income is now rental income. The Cold Storage Hangar and use of Hangar #5 withou<br>will drive this number (in addition to tie down use). FY24 year to date is skewed by so<br>Airways eviction/property abandonment issue. | langars, their<br>It a master lease |
| Catering  |                                     |
| Moved to Flight Line Services to streamline accounts. All individual service types can through our point of sale system   | be assessed                         |
| After Hour Call Out   | 10,000                              |
|   | 10,000                              |
| Customers are billed for after hour call outs.  | 7.000                               |
| Flight Line Services<br>GPU, LavCart, and related services on the line (non-fuel). Catering support (ice, coffe<br>meal delivery, is included here)   | ee, coordinating                    |
| Rental Car  | 3,000                               |
| The airport has agreements with three rental car companies and provides rental service passengers and local customers. The airport earns a percentage of each rental agree  |                                     |
|   |                                     |
